## Artificial Intelligence Engineering Student

Final-Year Informatics Engineering Student | Damascus University

### CONTACT

Phone  
0983974032

### CORE SKILLS

Machine Learning  
Deep Learning  
Computer Vision  
PyTorch  
OpenCV  
Scikit-learn  
Pandas

### PROGRAMMING

Python  
C++  
Java

### WEB & DATA

Laravel  
React  
MySQL

### LANGUAGES

Arabic - Native  
English - Good

## PROFESSIONAL PROFILE

Final-year Informatics Engineering student specializing in Artificial Intelligence, with practical experience in software development and AI-based applications. Interested in Machine Learning, Deep Learning and Computer Vision, with hands-on knowledge of Python, PyTorch, OpenCV, Scikit-learn and Pandas, in addition to web development using Laravel and React.

## SELECTED PROJECTS

01

### E-Shop

A complete e-commerce application that allows users to browse and purchase products, make electronic payments, request delivery to a preferred location, and save favorite items for quick future access.

02

### Dmas Hotels

A hotel booking and management platform that brings hotels in Damascus together in one place, allowing users to reserve rooms or suites while providing hotel owners with tools to manage their hotels and reservations.

03

### Smart School Management & AI Attendance System

A comprehensive school management system that automates administrative operations and includes intelligent attendance using cameras and Machine Learning techniques to recognize students and record attendance automatically.

## EDUCATION

### B.Sc. in Informatics Engineering

Artificial Intelligence Specialization - Damascus University

Final Year
